

“Manifesto for Ecological Justice”

- No subsidies for rich industries that are in trouble except for those that agree to not retrench workers and who do not try to force a smaller wage packet on them :
- A cut off in the size of the work force (the size of which will depend on the company’s rate of profit) below which no subsidies can even be proposed.
- A progressive Tax Rate whose steepness does not follow the present rules whereby all incomes have Rs. 5 lakh or taxed at 30%
- No rebates on capital gains.
- Close the Tax havens in Mauritius, for example –Hindu see The, March 9, 2008, while by Markandya Hatyu.
- Cut military budget by 34% enhance health for the poor budget.
- Bring back the system of rations for the poor.
- One card for all purposes for each individual family.
- Throw World Bank and IMF out of the 3rd world.
- Institutionalize “People’s Audits” on Rights to Water, Gender, Child, employment and all government activities.
- Cancel all debt of the Global South immediately.
- Go back to the Gold Standard; if not then remove the US \$ from its almighty position as the World’s Reserve Currency. Institute a nominal world currency whose “value” is a weighted average of all currencies, the individual weights being determined by the degree to which a country socializes the instruments of sovereignty production. The device ensures that this scheme is an infringement on national does not carry any political appeal whatsoever. The idea that way ward states can be penalized by the LIN (SANCTIONS, for example) is not at all new.
- Demand freer movement of people, stop free movement of capital.

Proposed by Meher Engineer, Chairperson, Working group on Ecological Swaraaj (SADED) & President, Indian Social Sciences Academy, Allahabad
